

# Use-Case Specification: Develop Project Charter

## 1 Use-case description

Development of project charter is the ability to let the user create a project charter.

## 2 Actor

Project Manager/User

## 3 Preconditions

The following preconditions have to be present:

- Project Statement of Work(SOW)
- Business case
- Agreement
- Enterprise environmental factors
- Organizational process assets
- List of Stakeholders

## 4 Scenarios

- The user logs into the system with username and password
- The user initiates a new project by selecting File->New Project
- The user enters a project name
- The system shows a panel with text-boxes to enter detail of project charter
- SOW will be written in the text-box
- The user enters the business case in the space provided
- The user defines the high-level scope of the project
- Project milestones, assumption, constraints and dependencies are added to a list by the user.
- New stakeholders are added to the project charter and their roles are defined
- The user saves the project charter and exits.
